Instructor and Course Schedule

- Section I- Dr. Adnan Ozsoy
  - adnan.ozsoy@hacettepe.edu.tr
  - Office: Z08

- Section II- Dr. Erkut ERDEM
  - erkut@cs.hacettepe.edu.tr
  - Office: 114

- Section III- Dr. Gonenc Ercan
  - gonenc.ercan@hacettepe.edu.tr
  - Office: 212

- Lectures: Tuesday, 10:00 - 10:45 @D2-D3-D4
  Thursday, 13:00-14:45 @D2-D3-D4
- Practicum (BBM204): Thursday, 15:00-14:45@D1-D2-D3-D4
Instructor and Course Schedule

• Teaching Assistants

• Ali Caglayan alicaglayan@cs.hacettepe.edu.tr
• Cumhur Yigit Ozcan cumhuryigitozcan@cs.hacettepe.edu.tr
• Levent karacan karacan@cs.hacettepe.edu.tr
• Selman bozkir selman@cs.hacettepe.edu.tr

• Practicum (BBM204): Thursday, 15:00-14:45@D1-D2-D3-D4
About BBM202-204

• This course concerns programming and problem solving, with applications.

• The aim is to teach students how to develop algorithms in order to solve the complex problems in the most efficient way.

• The students are expected to develop a foundational understanding and knowledge of key concepts that underly important algorithms in use on computers today.

• The students are also be expected to gain hand-on experience via a set of programming assignments supplied in the complementary BBM 204 Software Practicum.
Why study algorithms?

Their impact is broad and far-reaching.

Internet. Web search, packet routing, distributed file sharing, ...

Biology. Human genome project, protein folding, ...

Computers. Circuit layout, file system, compilers, ...

Computer graphics. Movies, video games, virtual reality, ...

Security. Cell phones, e-commerce, voting machines, ...

Multimedia. MP3, JPG, DivX, HDTV, face recognition, ...

Social networks. Recommendations, news feeds, advertisements, ...

Physics. N-body simulation, particle collision simulation, ...

Movies, video games, virtual reality, ...

Cell phones, e-commerce, voting machines, ...

Recommendations, news feeds, advertisements, ...

N-body simulation, particle collision simulation, ...
Old roots, new opportunities.

- Study of algorithms dates at least to Euclid.
- Formalized by Church and Turing in 1930s.
- Some important algorithms were discovered by undergraduates in a course like this!
Why study algorithms?

To solve problems that could not otherwise be addressed.

Ex. Network connectivity.
Why study algorithms?

For intellectual stimulation.

“For me, great algorithms are the poetry of computation. Just like verse, they can be terse, allusive, dense, and even mysterious. But once unlocked, they cast a brilliant new light on some aspect of computing.” — Francis Sullivan

“It has often been said that a person does not really understand something until he teaches it to someone else. Actually a person does not really understand something until he can teach it to a computer, i.e. express it as an algorithm. The attempt to formalise things as algorithms leads to a much deeper understanding than if we simply try to comprehend things in the traditional way. Algorithm must be seen to be believed.” — Donald Knuth
Why study algorithms?

To become a proficient programmer.

“ I will, in fact, claim that the difference between a bad programmer and a good one is whether he considers his code or his data structures more important. Bad programmers worry about the code. Good programmers worry about data structures and their relationships. ”

— Linus Torvalds (creator of Linux)

“ Algorithms + Data Structures = Programs. ”

— Niklaus Wirth
Why study algorithms?

They may unlock the secrets of life and of the universe.

Computational models are replacing mathematical models in scientific inquiry.

\[ E = mc^2 \]
\[ F = ma \]
\[ \left[ -\frac{\hbar^2}{2m} \nabla^2 + V(r) \right] \Psi(r) = E \Psi(r) \]

20th century science
(formula based)

21st century science
(algorithm based)

“Algorithms: a common language for nature, human, and computer. ” — Avi Wigderson
Why study algorithms?

Why study anything else?
Communication

• The course webpage will be updated regularly throughout the semester with lecture notes, programming assignments and important deadlines.

• http://web.cs.hacettepe.edu.tr/~bbm202

• https://piazza.com/configure-classes/spring2016/bbm202
Getting help

- **Office Hours**

- **BBM204 Software Practicum**
  - Course related recitations, practice with algorithms, etc.

- **Communication**
  - Announcements and course related discussions
  - through [Piazza](https://piazza.com/configure-classes/spring2016/bbm204)
Coursework and grading

Midterm exams 60% (12+32+16%)
• Three closed-book exams
  • in class on March 8, April 7 and April 26, respectively.

Final exam. 40%
• Closed-book
• Scheduled by Registrar.

Class participation.
• Contribute to Piazza discussions.
• Attend and participate in lecture.
Programming assignments (PAs)

- Five assignments throughout the semester.
- Each assignment has a well-defined goal such as solving a specific problem.
- You must work alone on all assignments stated unless otherwise.

Important Dates

- Programming Assignment 1    16 February 2016
- Programming Assignment 2    3 March 2016
- Programming Assignment 3    17 March 2016
- Programming Assignment 4    7 April 2016
- Programming Assignment 5    28 April 2016
Cheating

What is cheating?
• Sharing code: by copying, retyping, looking at, or supplying a file
• Coaching: helping your friend to write a programming assignment, line by line
• Copying code from previous course or from elsewhere on WWW

What is NOT cheating?
• Explaining how to use systems or tools
• Helping others with high-level design issues

Penalty for cheating:
• Helping others with high-level design issues
• A violation of academic integrity, disciplinary action

Detection of cheating:
• We do check
• Our tools for doing this are much better than most cheaters think!
Resources (textbook)

---

**Booksite.**

- Brief summary of content.
- Download code from book.

http://www.algs4.princeton.edu
Course outline

Introduction

Analysis of Algorithms
- Computational Complexity

Sorting
- Elementary Sorting Algorithms,
- Mergesort,
- Quicksort,
- Priority Queues and HeapSort

Searching
- Sequential Search
- Binary Search Trees
- Balanced Trees
- Hashing,
- Search Applications
Course outline

Graphs
• Undirected Graphs,
• Directed Graphs,
• Minimum Spanning Trees,
• Shortest Path

Strings
• String Sorts, Tries,
• Substring Search,
• Regular Expressions,
• Data Compression

Advanced Topics
• Reductions
• Intractability
