BBM103 Introduction to Programming Lab 1
Week 9

Fall 2018

Lab Exercises

1. Write python program

   a) that creates a dictionary such that its key value (from *1* to *n*) determines the number of stars in its value (e.g. {'3' -> ['*', '*', '*']}) than displays them in the following pattern (with n = 8)

   ```
   *
   **
   ***
   ****
   *****
   ******
   *******
   ********
   ```

Note: Use **dictionary comprehensions** in all programs.
